## **EDITORIAL**

*As the editor of the journal “Interdisciplinary Journal of Contemporary Research”, I welcome all the readers of the journal. If “interdisciplinary” connotes anything, it should be improved communication across disciplines that foster mutual understanding. This, in turn, advances our understanding of the deeply complex ethical and moral issues facing our world today. Acknowledging the need for diversity and integrity in speaking to these issues, “Interdisciplinary Journal of Contemporary Research” promotes dialogue, reflection, inquiry, discussion, and action. These activities are informed by scholarship and by the acknowledgment of the civil and social responsibilities of academe to engage the world beyond the ivory tower.*

*The aims of the journal are to examine the nature of disciplinary practices and the interdisciplinary practices that arise in the context of ‘real world’ applications. It also interrogates what constitutes ‘science’ in a social context, and the connections between the social and other sciences. The focus of papers ranges from the finely grained and empirical, to wide-ranging multidisciplinary and trans-disciplinary practices, to perspectives on knowledge and method.*

*The articles and research papers which we have received for publication for the Vol. 12, No. 6 issue are applauding which depicts the utmost sincere investigative work of the scholars, contributors and teachers. We have tried to accommodate various essays and articles pertaining to interdisciplinary research.*

*We hope to receive a very positive response from your end. We solicit your kind suggestion, inputs and instructions for enriching the quality and content of this journal from time to time.*

## **EDITORIAL**

*As the editor of the journal “Interdisciplinary Journal of Contemporary Research”, I welcome all the readers of the journal. If “interdisciplinary” connotes anything, it should be improved communication across disciplines that foster mutual understanding. This, in turn, advances our understanding of the deeply complex ethical and moral issues facing our world today. Acknowledging the need for diversity and integrity in speaking to these issues, “Interdisciplinary Journal of Contemporary Research” promotes dialogue, reflection, inquiry, discussion, and action. These activities are informed by scholarship and by the acknowledgment of the civil and social responsibilities of academe to engage the world beyond the ivory tower.*

*The aims of the journal are to examine the nature of disciplinary practices and the interdisciplinary practices that arise in the context of ‘real world’ applications. It also interrogates what constitutes ‘science’ in a social context, and the connections between the social and other sciences. The focus of papers ranges from the finely grained and empirical, to wide-ranging multidisciplinary and trans-disciplinary practices, to perspectives on knowledge and method.*

*The articles and research papers which we have received for publication for the Vol. 12, No. 6.1 issue are applauding which depicts the utmost sincere investigative work of the scholars, contributors and teachers. We have tried to accommodate various essays and articles pertaining to interdisciplinary research.*

*We hope to receive a very positive response from your end. We solicit your kind suggestion, inputs and instructions for enriching the quality and content of this journal from time to time.*

**Date : 10<sup>th</sup> June, 2025**
